DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-5, 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Butler (5,513,139).

Butler (Fig.4A) discloses a memory cell, **comprising**: a charge storage element (charge storage layer 35), a one-transistor switch (T1) constructed and arranged to selectively connect the storage element to a first data line (30), responsive to a first select signal (28), and a one-transistor gain element (T2) having an input connected to receive a signal from the storage element and constructed and arranged to selectively provide a corresponding output signal to a second data line (31), the gain element comprising a FET (the picture showing CMOS FET transistor) having a first terminal (the gate terminal) connected to the storage element, a second terminal (the source/drain terminal) connected to the second data line and a third terminal (the drain/source terminal) selectively connected to one of a first power supply and a second power supply, the FET being symmetrical with respect to the second and third terminals (in MOSFET

technology, the drain and source terminals are interchangeable due to its symmetry), wherein the switch transfers a signal from the first data line onto the storage element and transfers a signal from the storage element onto the first data line when selected by the first select signal.

Butler (in Abstract) teaches a method of addressing an array of memory cells, comprising a write address decoder for writing groups of bits linearly arrayed with respect to each other (in first direction) and a read address decoder for reading groups of bits linearly arrayed with respect to each other and orthogonally disposed to the groups of bits written (in second direction, opposite the first direction).

Allowable Subject Matter

2. Claims 11-13 are allowed.

Response to Arguments

3. Applicant's arguments with respect to claims 1, 4-5, 7-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2824

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
